

TERRA LANA WOOL INSULATION RETURNING YOUR OFFCUTS

Turn your offcuts back into recycled Terra Lana—no more landfill!

INSTRUCTIONS

KEEP SOME BAGS

Open new bales with a sharp knife around the top—leaving the rest of the bag intact for returning offcuts. You may need about one bag per 5 bales.

BAG THE OFFCUTS

Ensure the offcuts are clean and free from contaminants like shavings, strapping, wire, nails, etc.

COMPRESS AND SEAL

Get as much in there as you can and seal off the top using a cable tie or tape. If the bag has no holes, you can use a vacuum to suck out the air—this will compress the offcuts well. Vacuumed bags can be put into another bag to help hold compression. Include your other empty plastic bags too—we'll deal with those for you.

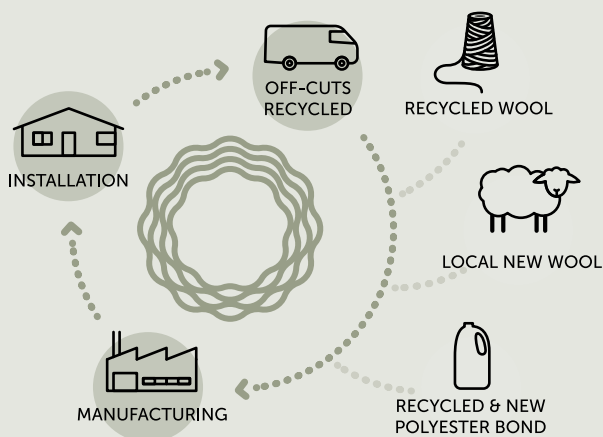

CONTACT US: SALES@TERRALANA.CO.NZ

With:

- Your location
- Number of bags
- Photo of bags if possible
- Weight and m3 if possible

We will let you know the nearest drop off point to take them to, any cost if applicable, and then we'll take care of it from there!

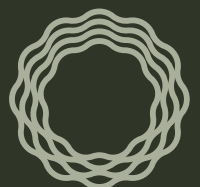

RENEWABLE BY NATURE.
SUSTAINABLE BY CHOICE

The recycling of off-cuts ensures we close the loop on waste, by choosing a circular lifecycle model—from recycled & natural material origins to manufacturing, installation and back again. Thank you for playing your part!

building wool innovation for life.
