

The barbed design of TerraPegs provide resistance not found on traditional wood or steel staples. This feature insures better holding power to anchor Dagmat.

PEG PEAK FORCE TO REMOVE

TERRAPEG 200mm	7.0 kg
TERRAPEG 150mm	3.4 kg
STEEL STAPLE 200mm	1.8 kg
STEEL PIN 200mm	0.3 kg

3RD PARTY TESTING RESULTS

Samples of each kind and size of peg were inserted into compact soil, then an instrument measuring the amount of force required to remove them was used. Peak Force indicates the amount of kilograms of force needed to remove each peg from the soil.

3rd Party Testing was conducted by Trace Laboratories, Inc. located in Palatine, IL 60067.
